PROJECTS

MediFinder – Medicine Availability Finder | [Live Link](#) | [GitHub](#) — *React, Node.js, Express.js, MongoDB, JWT*

- Built a scalable platform for searching medicines with real-time availability and pricing, featuring JWT-secured role-based login for users and pharmacists.
- Developed a pharmacist dashboard with full CRUD inventory management; optimized API queries for fast search response across a responsive React UI.
- Optimized database queries to enhance search performance and built a fully responsive UI using React.js, Node.js, Express.js, and MongoDB.

Swiggy Clone – Food Delivery Platform | [Frontend](#) | [Admin Panel](#) — *Next.js, TypeScript, Redux Toolkit, Tanstack Query, Zustand, React Hook Form*

- Built a food delivery web application inspired by Swiggy, featuring restaurant/menu browsing, cart management, and order placement with a responsive React UI.
- Developed a companion admin panel for managing restaurants, menu items, and orders, enabling real-time updates to listings and order status.
- Structured REST APIs with Node.js, Express.js, and MongoDB to support smooth data flow between the customer-facing app and admin dashboard.

Doctor Appointment Booking App | [Patient App](#) | [Admin panel](#) — *Next.js, TypeScript, Redux Toolkit, Tailwind CSS, React Hook Form*

- Built a patient-facing appointment booking platform with OTP-verified registration, doctor listing/details, and slot booking, using Next.js App Router, TypeScript, and Redux Toolkit.
- Developed a companion admin panel for managing doctors, appointments, and departments, with form validation via React Hook Form and Yup and a responsive Tailwind CSS UI across both apps.

Portfolio | [Live Link](#) | [Git Hub](#) — *React.js*

- Engineered a fully responsive portfolio website using React.js showcasing 4+ live project demos with tech stacks and achievement badges with certificate verification links.
- Optimized for recruiter engagement with mobile-first design, clean navigation, and an interactive contact section.
